NDEx Installation Instructions

Last updated: January 7th, 2022

Overview

The NDEx server can also be installed and run locally in case the use of a public server is not compatible with an organization's security or privacy requirements. If you wish to run your own, private NDEx server instance, this page provides all necessary files and instructions.

We recommend you always review the NDEx Release Notes (../release-notes) prior to performing an upgrade to learn about the improvements in the lates version.

Should you encounter any probles during the installation/upgrade process, please Contact Us (../contact-us) and we'll be happy to help you troubleshoot.

NDEx Installation

To install your own NDEx server instance, please download the **NDEx 2.4.4 Installation Bundle** (../ftp_page/NDEx-v2.4.4.zip), extract all files and follow the instructions contained in the "NDEx Installation Instructions" PDF file.

NDEx Upgrade

Once NDEx is installed, please dowload the **NDEx Upgrade Package** (../ftp_page/NDEx-v2.4.5.zip), extract all files and follow the included instructions. The latest available upgrade package is **NDEx v2.4.5**.
